

Epidemiologist (m/f/d)

full time – JobID: P0025V499

Starting March 2022 searched for Division of Infectious Diseases and Tropical Medicine.

The position is limited to 2 years. With the intention to acquire additional grant funding to make it longer term. Salary: TV–L

The Division of Infectious Diseases and Tropical Medicine at Heidelberg University Hospital covers patient care in tropical medicine on a national level and is embedded in a research-active university campus. We need your support and team leading for the growing number of funded projects we have acquired. The position is limited to 2 years with the intention to acquire additional grant funding to make it longer term.

Tasks and Responsibilities ▲

You will be responsible for the management, monitoring, implementation and analysis of diagnostics clinical studies. The specific activities will include but not be limited to (list in order of importance and/or time spent):

- Overseeing and managing projects and ensuring progress towards pre-determined goals. Primary focus of projects: validation and demonstration/implementation studies that enable WHO review and global/national policy making (including travel)
- Advanced analysis of data
- Writing and supporting the publications and scientific presentations (incl. travel for presentations)
- Support and lead grant development activities. Actively engage with donors
- Develop and maintain a strong network of partners in academia, industry as well as implementation partners, nationally and internationally (incl. travel for meetings with partners)

Prerequisites ▲

- Post graduate knowledge in epidemiology. A good technical understanding of diagnostics would be an

asset

- Strong scientific background and clear understanding of Tuberculosis and related public health issues
- A good understanding of other infectious diseases would be an added benefit
- At least 2 years' experience in clinical trial planning, execution, preferably diagnostics trials
- Relevant experience working in low and middle-income countries
- Work well in team of multi-cultural backgrounds; effective communication

Ability to work without close supervision as well as to work under pressure and meet tight timelines on a result-oriented basis. Willingness to expand knowledge base and take on new topics.

What we offer

- Target-oriented individual further education and training opportunities
- Targeted training on the job
- Ticket for public transport
- Possibility of child care (crèche and kindergarten) as well as subsidy for holiday care for school children
- Active health promotion
- Company pension scheme
- Access to the university library and other university facilities (e.g. university sports)
