

## Research Assistant (m/f/d)

full time – JobID: P0025V500

March 2022 searched for Division of Infectious Diseases and Tropical Medicine.

This position is limited to 1 year. With the possibility to extend another year.

The Division of Infectious Diseases and Tropical Medicine at Heidelberg University Hospital covers patient care in tropical medicine on a national level and is embedded in a research-active university campus. We need your support for the growing number of funded projects we have acquired. The position is limited to 1 year with the possibility to extend another year.

You will be supporting the management, monitoring, implementation and analysis of diagnostics clinical studies, analyses and systematic reviews.

### Tasks and Responsibilities ▲

The specific activities will include but not be limited to:

- Supporting the team in project planning and project management and enabling progress towards pre-determined goals. Primary focus of projects: diagnostic studies, and demonstration/implementation studies, data analyses (including travel)
- Leading on projects (e.g. survey or systematic review) under supervision of a team member
- Interact with international network of partners in academia, industry as well as implementation partners, nationally and internationally
- Supporting the writing of publications and scientific presentations (incl. travel for presentations)

### Prerequisites ▲

- A good understanding of other infectious diseases; An understanding of tuberculosis would be an added benefit.

- Scientific background in epidemiology: A master degree epidemiology, public health or similar would be of benefit.
- Experience in clinical trial planning, execution and monitoring would be an added benefit. Experience with Good Clinical Practice. Relevant experience working in low and middle-income countries would be an added benefit.
- Project management skills
- Willingness to expand knowledge base and take on new topics. Work well in teams of multi-cultural backgrounds; effective communication.

## What we offer

- Target-oriented individual further education and training opportunities
- Targeted training on the job
- Ticket for public transport
- Possibility of child care (crèche and kindergarten) as well as subsidy for holiday care for school children
- Active health promotion
- Company pension scheme
- Access to the university library and other university facilities (e.g. university sports)

## Contact & Application
